

# Bloom-Icenia Trade Contract for Heliodor (BITCH) Agreement

An agreement between the government of the State of Bloom (hereafter “Bloom”) and the government of Icenia (hereafter “Icenia”), herein referred to as “the parties”, for Bloom to provide Heliodor gems to Icenia in exchange for Meteoric Iron ingots and access to the national Elite Smelter.

1. Bloom will create Polished Heliodor gems for Icenia to use in its Meteoric Iron mining operation. Whenever so desired by both parties, Icenia will pay Meteoric Iron ingots to Bloom for the full run (16 total) of Polished Heliodor Gems, at an exchange rate mutually agreed upon by both parties, taking into consideration both the global market rate and the unique needs and circumstances of Icenia and her states. These polished gems will be delivered within a reasonable time frame from the time of agreement, so as to not disrupt the Meteoric Iron mining operation of Icenia.
2. Bloom will maintain access to the Elite Smelter in Icenia city via individuals granted access by Icenia.
  - a. If needed, Bloom will repair the factory themselves.
3. The Parties will maintain communication regarding when the acquisition of the Heliodor gems is needed to continue executing the meteoric mining operation.
4. The Parties agree to the terms laid out in this agreement; should one of the parties wish to alter these terms it must be agreed upon by both parties.
5. Should Icenia wish to terminate this agreement, if a run of Heliodor refining is in progress, that order will still be valid under this agreement and must be fulfilled.
6. Should Bloom wish to terminate this agreement, it must fulfil any agreed upon runs of Heliodor prior to termination.
